

Pillar Network Gateway

Pillar's Network Gateway provides connectivity across your site. It requires 120V power and cellular connectivity. Deploy one or multiple across your site to ensure good network connectivity across the job site.

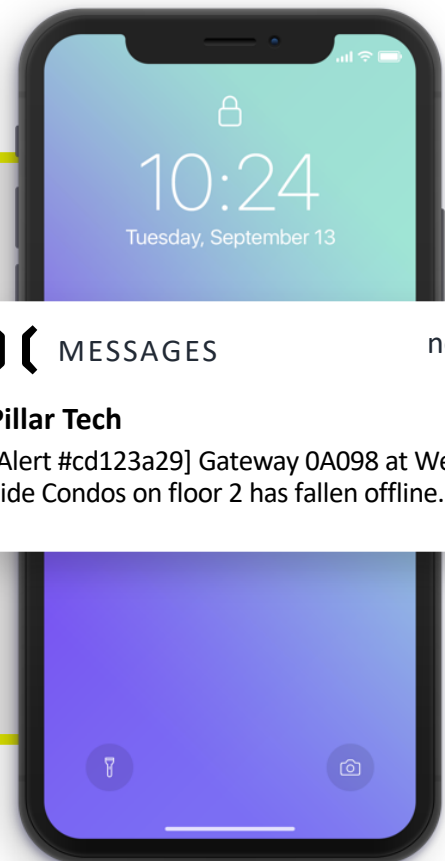

)) **NETWORK**
LoRa (Cellular backhaul)

)) **BACKBONE OF THE NETWORK**
Smart Pods send data to the Network Gateway which relays data to the cloud

)) **BEST PLACEMENT LOCATIONS**
Permanent power locations, jobsite trailers, roofs, finished and locked spaces

)) **INSTALL SETUP OPTIONS**
Antenna options & configurable mounting methods

)) **COMPATIBLE PILLAR PRODUCTS**
Smart Pods, Leak Pucks, Water Monitors

)) MESSAGES now

Pillar Tech

[Alert #cd123a29] Gateway 0A098 at West Side Condos on floor 2 has fallen offline.
